

Firenock Review by Chirs Burbach May 26, 2008 Firenock GSH (SI), Lightning Nock GSH (LG)

I have recently ordered the new G series Lightening nock and Firenock. I first ordered the Lightening nock and compared to other lighted nocks on the market I've used there's NO comparison, It's far superior in my opinion. Upon being so impressed and pleased with the performance and technology I ordered the Firenock and extra accessories and to no surprise the quality was SUPER! I no longer need to look any further for quality lighted nocks. They light every time, don't turn off until I do it, Super bright, take a toughness and stability to a new level.

I am sold on Firenock and have spread the word to all my friends that this is the nock of the future and it's one to have in the hunting arsenal!

Thanks for everything! I look forward to more great products and can't wait to get my Target nock ordered!
