

*Firenock Review by James Mathes August 30, 2008*

*Firenock GSH (GS)*

I've been practicing with the new Firenock Style "S" for a few weeks now and wanted to comment on how much I like them. They light up every time, and I really appreciate not having to mount a magnet on my bow to make that happen. They're extremely bright, and turning them off is easiest of all the different lighted nocks I've tried. I can hardly wait to use them in hunting season! Thank you for making a great new archery product.
