

Firenock Review by Duane Emmons, 25th September 2008 on ArcheryTalk  
Firenock GS

Iv'e got the Lumenocks, the Easton Tracer nocks and the Firenocks and I guarantee you the Firenocks blow them all away! The Lumenocks are really bright but they hardly ever work and the Tracer Nocks work great but they aren't even close to being as bright as the Lumenocks or Firenocks. The Firenocks are 3X brighter than the Tracer nocks and don't require any magnets to work so that also means there are no magnets to stick on your riser or to lose. Without a doubt the Firenocks are the way to go.
