

Firenock Review by Lucas Schuepbach, 8th October, 2008
Firenock GAH (GA)

I bought a pack of three from my local proshop dealer and they worked flawlessly. I love the the easy installation and how reliable this product is. I will never purchase a different companies' lighted nock.

The thing I like most about the Firenock is how bright it is, the Lumenok can not compare. It has a glow that is very easy to see, even in the (day) light. The color that I purchased is red. It stands out like you wouldn't believe. I tried the other lighted nock companies; all of them. I would not get my nock to stay lit. When I shot the Lumenok and it hit the deer, it shut off? Luckily I still found my arrow buried under weeds. The raccoons I have shot with the Firenocks have always stay lit, and have never let me down.

It amazes me at how easy this nock is to use. once it reaches speed, it turns on, then you just drop it on its butt to shut it off! love it! I tried all the other lighted nocks at a local proshop and they didnt compare to the Firenock. I realize that Firenocks are more expensive, but when it comes to a 50 dollar arrow flying through the air, I want to find it and have confidence in finding it, thats where the Firenock comes in.

Excellent Product.
