

Firenock Review by Daniel Sochor, Nov 13, 2008
Firenock GSH (GS)

Just wanted to pass along my thoughts. I took my best buck ever using your firenocks. Though it was a bright sunny morning and a lethal shot the light burned very bright. While it was not necessary in my recovery this time, I was extremely impressed to see my Christmas bulb launch and bury itself up to fletchings in my buck. I watched it run away with that beacon lit. Fascinating.

I am a very pleased customer. You have an excellent product.

Here are the photos. You may use them if you like. It matters not to me, but I will probably always use firenocks now. One dark dismal day they are gonna be a real advantage.

Thanks again for all your help!
