

Firenock Review by Jeff Johnson, Nov 13, 2008  
Firenock GAH (GA)

Here is a photo of the deer that I shot using the Firenocks. This deer was harvested on November 2, 2008, it green scores 161 5/8" Pope & Young. The Firenock is by far the best lighted nock that I have ever used. After the shot there were no doubts as to where the deer was hit. From this point forward the only lighted nock system I will use is the Firenock! Thanks for a great product.
