

Firenock Review by Michael Weatherwax, 26th January 2009
Firenock GS

Here is a buck I shot with the Firenock this year. Nock worked perfect. Was brite and a laser through the lungs. Stayed lit so it was easy to find my arrow

Another firenock deer. Works every time. Can even wash them and they work after. THIS doe was shot in 12 below zero weather. Firenock worked as advertised.
