

Firenock Review by Kurt Meyers, 14th August 2009  
Firenock GA

I can easily say that Firenock's are the best lighted nock that I've tried. I've never had one not work when it should. Very bright and consistent. I've never had one shut off after hitting the target or passing through the target.

I also like to use the practice nocks (although they are not as fun as the lighted nock!). I'd like to see a longer battery life than 13 months and that sounds like it might be coming. Dorge (Firenock LLC's Operating Manager) always impresses me with his desire to improve his product.
