

Firenock Review by Gregory Coya, (December 28, 2009)  
Firenock GAH (A1, A3)

Hi Mr. Huang,

I'm the guy from Land O lakes that e-mailed you about Log Cabin Archery. Well, I ordered more because the previous one has worked so well. I've shot 2 hogs and many at my broad head target and it has been infallible. I have not had 1 issue. Both hogs were pass throughs and have had rough treatment. Ordered your hunting pack. I have noticed my FOC has changed so I went to feathers. My Hoyt alphamax 35 is set at 60# 29' draw. I use rage 3 blade broadheads. I'm getting 260 FPS because my arrows weigh 405 grains. I still get 61 of kinetic energy. Use Easton axis arrows.

Thanks again for a great product. I'll keep getting the word and hunting experiences out there.
