

Dorge:

I recently purchased 2 Firenock "S" 3 packs, with the shock end caps (Invoice # 0000005831).

I would like to take this opportunity so tell you what a great product you have in the Firenock. I have used other brands of lighted nocks in the past, but yours appears to be far superior to the other brands that I have used. The simplicity of the shot activated switch, and the durability of the unit are the high points to me. I have shot a Firenock hundreds of times into a practice target with a high speed bow (309 fps), and it continues to perform and it is still very bright! I am impressed!
